

FARHAAN KHAN

Bangalore, India

EDUCATION

B.Tech in Computer Science Engineering

REVA University, Bangalore

Expected Graduation: 2027

Coursework: Data Structures & Algorithms, Design & Analysis of Algorithms, DBMS, OOP, Artificial Intelligence

2023 – 2027

CGPA: 7.848 / 10.0

Class XII

Vivekananda Kendra Vidyalaya, Sri Vijayapuram

79.2% / 100

Class X

Vivekananda Kendra Vidyalaya, Sri Vijayapuram

88.8% / 100

PROJECTS

FlowTrace – C Code Execution Visualizer

React · JavaScript · Monaco Editor

- Developed a browser-based tool for visualizing C code execution step-by-step using JavaScript and React
- Implemented parsing and execution logic to track assignments, branches, and loop iterations with real-time variable state updates
- Integrated Monaco Editor for syntax highlighting and active-line tracking to simulate a debugger-like experience directly in the browser
- Supports core control structures including if/else conditions and loops, with a responsive interface for desktop and mobile devices

Folder Structure Visualizer

JavaScript · DOM API

- Built an interactive tool that converts indented text into a visual nested folder structure rendered dynamically in the browser
- Added one-click ZIP scaffold generation for quickly creating downloadable project folder templates
- Structured parsing, rendering, and export functionality into modular components for easier maintenance and extension

AptiVision — Placement Aptitude Visual Learning Platform

React · Vite · JavaScript · Tailwind CSS · Framer Motion

- Built a browser-based aptitude visualization platform covering modules such as Train Problems, Time & Work, Syllogisms, Venn Diagrams, and Percentages to help students understand placement problems through interactive visual explanations
- Implemented visual simulations, dynamic input handling, and step-by-step reasoning views with reusable components covering situation, formulation, invariants, execution, and edge cases
- Developed a Question Analyzer that identifies aptitude question patterns and maps them to the relevant learning modules for targeted practice
- Added local demo authentication with profile persistence for user login and registration flow using browser storage

SUMMARY

Computer Science Engineering student with practical experience building full-stack web applications, developer utilities, and browser extensions using Python, JavaScript, and FastAPI. Solid grounding in Data Structures & Algorithms, Object-Oriented Programming, and relational database design. Focused on creating functional, responsive, and user-friendly browser-based tools.

SKILLS

Languages

Python · JavaScript (ES6+) · C · SQL

Frontend

React · HTML5 · CSS3 · Tailwind CSS · DOM API · Vite

Backend & APIs

FastAPI · REST API design · JSON processing

Databases

MySQL · relational schema design · query optimization

Tools

Git · GitHub · VS Code · Netlify

CS Fundamentals

Data Structures & Algorithms · OOP · DBMS

Soft Skills

Problem Solving · Communication · Team Collaboration · Adaptability
